Hatim Debboun Achahbar

Backend Developer · Java · Spring Boot · Microservices

thos.debboun.hatim@gmail.com | +34 624 57 81 18 | Barcelona | linkedin.com/in/hatimdebboun | github.com/DebHatim

Professional Profile

Backend Java Developer specialized in Spring Boot, JPA/Hibernate and event-driven microservices architectures with Apache Kafka. I have designed, tested and deployed to production 2 complete backend projects, including one with a microservices architecture, gateway and full observability via Prometheus/Grafana/Jaeger, both with automated CI/CD on GitHub Actions and testing with JUnit 5, Mockito and Testcontainers. I bring that same ability to build maintainable, well-tested, production-ready software from day one, adapting easily to different environments and teams.

Projects

Order & Inventory System - Microservices | *Java 21 · Spring Boot 4.1 · Kafka · Gateway · Resilience4j · Docker*

- 4-microservice architecture (gateway, orders, inventory, notifications) with its own database per service and 100% asynchronous communication via Kafka.
- Centralized gateway with rate limiting (Redis), retries and circuit breaker per service (Resilience4j) with fallback controllers.
- Full observability of the distributed system: metrics with Prometheus/Grafana and distributed tracing with OpenTelemetry/Jaeger.
- Integration tests with Testcontainers (real MySQL + Kafka) verifying the full end-to-end flow; CI/CD with GitHub Actions.

Real-Time Price Alerts System | *Java 21 · Spring Boot 3.5 · React · Kafka · Docker · WebSocket*

- Event-driven architecture: a simulator publishes price changes to Kafka, a consumer evaluates active alerts and triggers real-time notifications.
- Instant dashboard notifications via WebSocket/STOMP, with resource-level authorization (IDOR prevention).
- Stateless authentication with Spring Security, JWT and BCrypt; rate limiting with Bucket4j on login.
- Full test suite (JUnit 5 + Mockito) with CI/CD on GitHub Actions; containerized infrastructure with Docker Compose

Hotel Reservation Management System | *Java 21 · Spring Boot 4 · Spring Security · JPA/Hibernate · MySQL*

- Role-based authentication and authorization (ROLE_USER / ROLE_ADMIN) with Spring Security 6 + BCrypt
- Double-booking prevention algorithm in the service layer with JPQL validation
- Admin panel with full CRUD and DTOs for layer decoupling
- Layered MVC architecture with Bean Validation for data integrity

Professional Experience

Full Stack Developer Oct. 2024 - Jun. 2025

Vertical Ibérica *Barcelona · On-site*

- Developed server-side business logic applying MVC architecture, separating responsibilities across layers to ensure maintainability — the same principles I apply in Spring Boot.
- Designed and modeled relational databases in MySQL, optimizing queries and managing data persistence.
- Implemented client-server architectures, managing data flow between layers consistently.
- Collaborated on an internal incident management tool applying Clean Code and SOLID principles.

IT Technician Sept. 2022 - May 2023

Escuela Rocafonda *Barcelona · On-site*

- Diagnosed and resolved hardware and software issues in a corporate Windows environment.
- User management and network connectivity in an educational infrastructure.

Technologies

Backend: Java 21, Spring Boot, Spring Security, Spring Cloud Gateway, JWT, Apache Kafka, WebSocket/STOMP, REST APIs, Swagger/OpenAPI, Microservices, Resilience4j

Frontend: JavaScript ES6+, React, Bootstrap, Thymeleaf, HTML5, CSS3

Persistence: JPA/Hibernate, Spring Data JPA, MySQL, PostgreSQL, Redis

Testing & Quality: JUnit 5, Mockito, Testcontainers, unit and integration testing, Clean Code, SOLID

Observability: Prometheus, Grafana, Jaeger, OpenTelemetry, Spring Boot Actuator

DevOps & Infrastructure: Docker, Docker Compose, Nginx, GitHub Actions (CI/CD), Git, Maven, Lombok · PHP (Vertical Ibérica)

Soft skills: Teamwork, communication, continuous learning, problem-solving, adaptability

Education & Training

Java & Spring Boot Specialist - Advanced JAVA/JEE Development Dec. 2025 - Mar. 2026
Ipartek Servicios Informáticos

- 210-hour advanced specialization in Spring Security, JPA/Hibernate, Java Streams and microservices architecture focused on enterprise backend development.

Higher Vocational Training - Web Application Development Sept. 2023 - Jun. 2025
IES Thos i Codina

Intermediate Vocational Training - Microcomputer Systems & Networks Sept. 2021 - Jun. 2023
IES Thos i Codina

Compulsory Secondary Education Sept. 2017 - Jun. 2021
IES Thos i Codina
